A job where you can make a difference:

- Overall responsibility for development and execution projects in the medical devices field – from concept phase through to series production, with significant influence on product strategy and market success
- Planning, controlling, and monitoring project progress, timelines, resources, and budgets, with corresponding decision-making authority and direct reporting to management
- Leading interdisciplinary project teams (R&D, Quality Management, Regulatory Affairs, Production, Purchasing, and external partners) within a collaborative and professional working environment
- Ensuring compliance with applicable standards and regulatory requirements (e.g. MDR, FDA, ISO 13485, ISO 14971), with the opportunity to actively contribute to regulatory strategies
- Coordination of verification and validation activities in close cooperation with internal experts and external partners
- Preparation and maintenance of project-related documentation
- Technical coordination with customers, suppliers, and development partners
- Identification and assessment of technical risks, as well as definition and implementation of appropriate mitigation measures
- Preparation and facilitation of project meetings, as well as regular reporting to executive management

Skills that make you our strength:

- Completed technical or scientific degree (Master's/PhD), e.g. in Medical Engineering, Mechanical Engineering, Electrical Engineering, Physics, or a comparable field
- Additional business or economic education is an advantage
- Relevant experience in leading complex development projects, ideally in medical technology or the life sciences industry
- Strong understanding of product development processes and regulatory requirements in medical device development
- Experience working with quality management systems
- Excellent organizational skills and a structured, solution-oriented working style
- Strong communication skills and team orientation
- Very good English skills, both written and spoken; German is an advantage
