

## Who we are:

**EBG MedAustron** is a cancer treatment and research centre in Wiener Neustadt that is unique in Austria. MedAustron uses ion therapy, an innovative form of radiation therapy, in the fight against cancer.

We offer a unique working environment built around the particle accelerator used for therapy and research with protons and carbon ions. We have set ourselves the goal of prolonging the lives of cancer patients and improving their quality of life.

As a **Test Manager**, you will play a **key role** within our dedicated Safety, Architecture & Regulatory Group. You'll be **responsible for leading all aspects of our test management** — from developing test strategies and overseeing verification and validation activities for new projects, to evaluating and implementing innovative testing technologies. You'll be working in a **purpose-driven environment** and **your expertise** will help ensure the safety and reliability of our particle accelerator that make a **real difference in patients' lives**.

**Share our spirit and become part of our team as a**
