

Who we are:

EBG MedAustron is a cancer treatment and research centre in Wiener Neustadt that is unique in Austria. MedAustron uses ion therapy, an innovative form of radiation therapy, in the fight against cancer.

We offer a unique working environment built around the particle accelerator used for therapy and research with protons and carbon ions. We have set ourselves the goal of prolonging the lives of cancer patients and improving their quality of life.

As a **Software Developer**, you will play a central role in our specialised System Implementation Group and **have the unique opportunity to develop software for particle accelerators**. You will **work in a meaningful environment where your expertise will contribute directly to the further development of our technology and ultimately to improving the quality of life of our patients**.

Share our spirit and become part of our "System Implementation" - group as a

Software Developer (f/m/x)
