

Who we are:

EBG MedAustron is a cancer treatment and research centre in Wiener Neustadt that is unique in Austria. MedAustron uses ion therapy, an innovative form of radiation therapy, in the fight against cancer.

We offer a unique working environment built around the particle accelerator used for therapy and research with protons and carbon ions. We have set ourselves the goal of prolonging the lives of cancer patients and improving their quality of life.

As a **Working Student in regulatory affairs**, you will **have the opportunity to shape the start of your career in the regulatory field and gain valuable initial professional experience**. In this role, you will **play an active part in routine regulatory tasks that are essential for our particle accelerator and, consequently, for our cancer treatments**. Through your work, you will ensure that our particle accelerator – and, by extension, our therapies – can be used safely, effectively and in full compliance with regulations at all times – **thereby making a tangible contribution to improving the quality of life of our cancer patients**.

Share our spirit, gain your first work experience whilst you're studying and become part of our "Safety Architecture & Regulatory" - group as a

Working Student Regulatory Affairs (f/m/x)

EBG MedAustron
