

Who we are

MedAustron International GmbH is a subsidiary of EBG MedAustron GmbH and realizes international technology projects in the course of the construction of a new particle accelerator in the rapidly growing medical technology sector. The parent company EBG MedAustron operates one of the most modern centers for ion therapy and research in Europe.

As a **Junior Accelerator Engineer**, you will become part of our dedicated MedAustron International team and work with us to **start your career** and become an accelerator professional. **We will teach you all the necessary skills** and **give you insight into exciting tasks** – from processing requirements for accelerator components and analysing technical problems to creating technical documentation. And all this in a **meaningful environment** where your work makes a direct contribution to cancer treatment and research.

Share our spirit, become part of our team and start your career as
